

Pyramid Pop up

Cut out the shape – fold back on all the solid lines, fold forward on the dotted lines. It should look something like this→

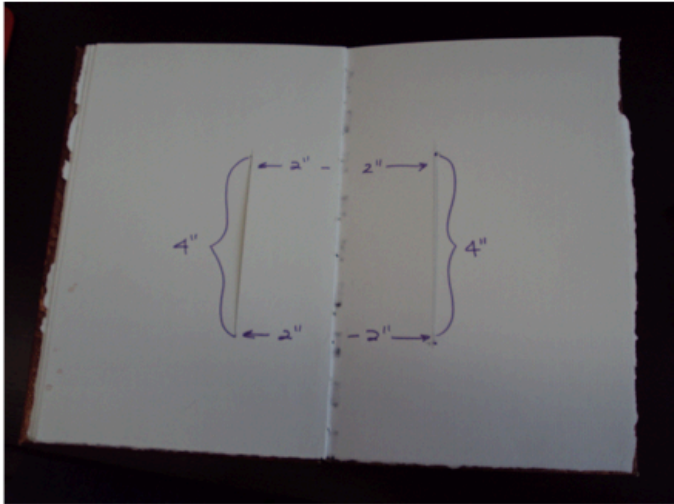

Decorate your pyramid before you glue it together into the shape, it's easier to work on flat.

Cut two slits in your book (remember to skip a page so you're not cutting into a page you've already worked on). Measure from the center spine out 2" each way, then cut a 4" long slit.

Here's a diagram:

Now, insert the pyramid into the slots. On two sides of your pyramid, there are flaps. Those go into the slots you've cut. It goes like this:

The bottom flaps get glued down – you can put tape over them, too if you need to.

Repeat for the other side, and your pop up should fold right up when you close your book!
